

TECHNICAL DESCRIPTION

PRODUCT NAME:	OP5000 BLACK PROFİ POLİSH
TYPE:	waterproof concentrate for the footwear
USAGE:	waterproof concentrate with the nutrition effect suitable for the grain leather and footwear with permeable membrane
SAFETY:	<ul style="list-style-type: none">-product is not dangerous-no harmful effect on the health-product is in the solid state in common conditions and there is not danger of the leak in the environment
COMPOSITION:	<ul style="list-style-type: none">-natural and synthetic waxes, waterproof additives, silicon oil, organic organic dyes, tanning greases and softeners- no dangerous materials
ARRANGEMENT FOR ENTINGUISH:	non-flammable, but the dry rests can burn providing the oxides of the carbon, for the extinguishing is suitable extinguishing foam or CO ₂
STORAGE:	between 5 °C – 40 °C, product cannot be exposed to direct shining
PHYSICAL AND CHEMICAL CHARACTERISTICS:	
-state:	solid
-colour:	transparent, brown, black
-odour:	light
-melting temperature:	80°-90°C
-explosiveness:	unexplosive
-flammability:	non-flammable
-oxidant characteristics:	none
-density:	1,0 kg/dm ³
-solubility in water:	miscible
-organic dissolving agents:	0%
