

# GOTLAND S1P

3H224EJ

CE UNI EN ISO 20345:2012 S1P SRC

Low shoe, anti-scratch back leather WRU thickness 1,8-2,0 mm. and perspiring and abrasion resistant technical fabric.  
Highly perspiring and abrasion resistant fabric lining.  
Shoe with refracting fabric insert.  
Reinforced heel area STABILITY SUPPORT in PU.  
Soft, lined and padded tongue.  
CLICK OPEN lacing system.

**TOECAP 200J** polymeric **composite non-thermic** according to EN 12568

**MIDSOLE flexible antiperforation composite fabric** according to EN 12568

**SOLE 3HYBRID** three-densities polyurethane antistatic, resistant to hydrolysis ISO 5423:92, to hydrocarbons and to abrasion, anti-shock and anti-slipping **SRC**

**ANTI TORSION** insert in the sole to assure stability on uneven ground

**INSOLE 5000**, three-materials extracomfort: perspiring, removable, anatomic, absorbing, ESD and anti-bacterial

**Size 39-47 Shoe weight Sz 42 gr. 530**

## SOLE

3Hybrid is a revolutionary line that thanks to the design of the sole ensures maximum shock absorber and energy return during the entire useful life of the shoe. 3Hybrid belongs to the 3D generation. This shoe is therefore equipped with 3 different layers of sole with relative densities, each specialized to maximize comfort, anti-slip and foot stability. The whole collection is also equipped with an anti-torsion insert to ensure additional support for the foot at every step.

## PLUS

### ZERO ABRASION

The Zero Abrasion technology is an anti-scratch leather, finished with a polyurethane multi-layer, that assures a complete protection of the upper against usury and abrasion. Highly resistant to water and oils, this leather is suitable for people who like wearing always clean and nice shoes even after months of usage.

### STABILITY SUPPORT

Stability Support is the Giasco technology that guarantees the maximum heel support during walking. Inside it there's a particular structure that localizes the support only on specific areas, in order to avoid an excessive stress of the foot. It helps the correct walking and a better discharge of the weight along all the foot, with advantaged for back and joints.

### ANTI TORSION

The usage of the anti-torsion shank is finalized to give to the shoe extreme stability on every ground. Mostly indicated for the building sector, where the risks caused by uneven and wet grounds are higher, this technology is very useful for people working on ladders (painters, windows' cleaners, bricklayers) as it increases the stability in the central part of the plant, the mostly standed area on the ladder. It limits the heel stress and helps plant arch and ankle.

### 3D TRIPLA DENSITA' INIETTATA

3D is a revolutionary certified technology that offers the only shoe with three different layers of polyurethane injected. The most external section, with hard mix, offers the maximum resistance for the surface contact and perfect SRC performances. The middle part, with a softer mix, assures comfort when walking. The higher section, next to the upper, guarantees better stability to the foot. Three densities and the combination of three colors are the special characteristics of this new shoes generation.

### CLICK OPEN

The Click Open system, thanks to the inox steel yarn and to its memory mechanism, assures a safe and uniform lacing. This allows to guarantee the maximum stability during walking and to avoid that internally the foot rubs with the upper. This technology is mostly suggested for people working with gloves, as thanks to the rotation of a simple knob it helps to quickly wear and remove the shoe.
