

OUTDOOR CATALOGUE 2023/2024

 **PLANAM**
Fashion for your profession

DEAR CUSTOMERS, DEAR PARTNERS,

The working world is varied, putting workwear and protective work clothing through its paces in a variety of ways on a daily basis. Here at PLANAM, we are dedicated to developing the right solutions for all these scenarios, regardless of whether you wish to use your clothing on a construction site, in a warehouse, in a cold storage depot or in a workshop.

Therefore, our PLANAM collections offer everything you could possibly want: from our high-visibility range and our heat-insulating cold storage/frozen storage collection to our leisure ranges, we have everything that everyone could possibly want.

In addition to meeting our customers' requirements, we balance a high level of comfort, top quality, modern design and maximum functionality. Our certified ranges also meet all the necessary safety standards.

You can always rely on us for this.

Best wishes, Christian Reckord

THIS IS WHAT WE ARE ALL ABOUT

FASHION FOR YOUR PROFESSION – for over 30 years. We are there for you when hard work is really needed: PLANAM is the perfect partner for your working day, balancing the highest quality, optimum fit and individual service.

As a medium-sized, owner-managed company, we have a close connection to our customers and we know exactly what is important when it comes to the development of workwear for a very wide range of industries and jobs: comfort, design, safety, quality and functionality. We also know that customers care about the availability of our products, constant ability to supply goods and top personal service. We implement our expertise at all levels. That is why PLANAM is now one of the leading providers on the market.

RESPONSIBILITY

To us, being an entrepreneurial company is all about acting responsibly – for people and the environment. That is why we see workwear not as a short-lived fast fashion item but as a long-term partner for your work.

Producing sustainable workwear requires a commitment to a high level of quality. You can rely on us for this in every respect. We therefore only use durable materials. The quality of the fabrics and colours we use is regularly tested and evaluated by independent laboratories, which guarantees the use of environmentally-friendly materials and non-hazardous colours. Our cotton items are also safe from a health perspective. Also, all product ranges meet the high demands of Standard 100 by Oeko-Tex.

Our partnership with long-standing suppliers is also carefully regulated to ensure quality, and to live up to our responsibility to both society and the environment. We

do not just rely on certificates and commitments made by our suppliers. We also make sure to conduct regular visits in person and ensure maximum transparency along the entire production chain.

We also refrain from using down in all the heat-insulating products in our ranges to ensure that we do not support live plucking. Instead, we use alternative materials to line our products, which provide equivalent protection against the cold.

SOCIALLY RESPONSIBLE AND FAIR

Sustainability is not a trend but a commitment. That is why we are members of the SocialFair initiative, a programme dedicated to improving sustainable processes in foreign production locations and German partner businesses.

The sustainable objectives of the programme are clearly defined: Transparent supply chains, safe and fair working conditions, better use of resources, fewer environmental pressures and comprehensive documentation.

In order to achieve this, manufacturers and importers have to undergo a three-step process. Initially, basic data about the businesses is collected. Then, data is collected about resource usage. In the final step, potential for improvement is highlighted on the basis of the information that has been collected. On this basis, programmes can be developed that allow processes to be made more sustainable. Through our membership in the SocialFair initiative, we contribute to environmental protection and ensure better working conditions, as well as the exclusion of child and prison labour.

You can find out more at <https://vfi-deutschland.de/social-fair>

PARTNERSHIP

For us, merchant loyalty is of central importance and an expression of our corporate philosophy. That is why we only supply the specialised trade. By doing so, we guarantee the best quality, reliability and comprehensive service, while our specialised trade partners ensure customer proximity and professional advice on site.

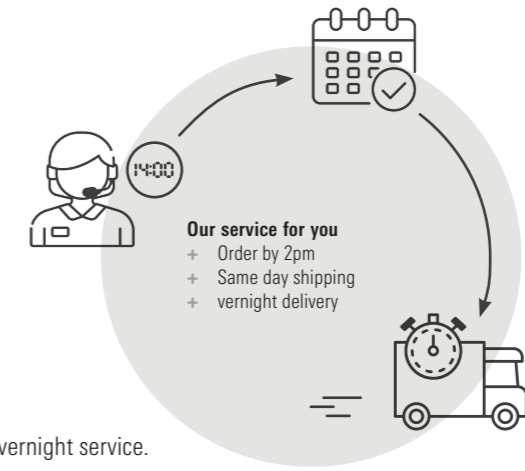

.....

This type of strong partnership has proven to be a recipe for success, which is demonstrated by us being selected as the "VTH Quality Partner" (Association of Technical Trade). However, we are not resting on our laurels and we are using this award to drive us on to continuously improve our services. Only in this way can we keep providing the best high-quality products and maximum level of customer care.

OVERNIGHT SERVICE

We are committed to providing our retail partners with a good service and high level of customer satisfaction and they are committed to providing the same to their customers. Key factors that contribute to satisfaction are the constant availability and fast delivery of our products.

That's why we created our overnight service. What this means for you: Simply place your order by 2pm and we'll dispatch it by courier on the same day so it arrives just in time, giving you the flexibility you need to meet all your customer requirements. The result is fast delivery and fast sales.

NORTH RHINE- WESTPHALIA LOCATION

Since it was established in 1987, PLANAM has not only been loyal to its Herzebrock-Clarholz location but also to its employees and partners.

+49(0)5245-86060

Personal service
A telephone call often helps to solve problems quickly and easily. You can therefore call us from Monday to Friday between 8am and 5pm.

Finishing in minimum quantities too
There is no need for you to wait for personalised goods to be sent from abroad. Thanks to our PLANAM Individual finishing service in Herzebrock-Clarholz, we can finish workwear to order straight away and deliver the goods quickly from as little as just one item. If you have any questions about the topics of finishing and certification, we will be happy to provide you with advice and support.

Fast delivery
18,750 pallet bays in a warehouse space amounting to 20,000 m2 guarantee our ability to supply goods at all times... if you order by 2pm, your goods will be with you or your customers on the following day.

APPLICATIONS

The PLANAM range is large and contains suitable workwear for a number of occupations. The only question is: which range is right for which occupation? We have structured our range according to the application area to help you find the right product for your needs.

Each application area lists the occupations and the matching PLANAM product ranges. Bricklayers, for instance, can find suitable products for their work in the "Building industry" area – quickly and easily.

Please note that these lists are not exhaustive. If your occupation is not listed in a specific application area, and you're not sure which product ranges are right for you, just get in touch. We are also happy to advise you on any questions regarding certified workwear that must meet required standards due to work being done in hazardous areas.

You can call us from Monday to Friday, 8 am to 5 pm.
Phone: +49(0)5245-86060

New!
All product pages show the suitable application areas with pictograms.

DRESSING IN LAYERS

Whether it's for work or for leisure, if you spend lots of time outdoors, you're bound to face weather conditions that are a challenge for body and clothing. The solution: the Outdoor Collection from PLANAM.

Sometimes it rains, sometimes it snows, sometimes an icy wind blows – that much is certain. But what kind of clothing is best for coping with these changeable weather conditions? The trick is to combine. The so-called "onion layer principle" makes the perfect outdoor outfit. This involves wearing different items of clothing over one another that are suitable for the weather conditions. Our Outdoor Collection has just the garments you need – from breathable functional underwear through to warm winter jackets.

Functional underwear
Breathable functional underwear provides the foundation for keeping your body temperature warm, while also ensuring maximum flexibility.

Base layer
The base layer is the layer that's closest to the body. It is responsible for keeping the body warm while also transporting away the moisture created by sweating.

Vest
A Vest is an optional additional layer over the middle layer when the temperature demands.

Accessories
Accessories such as warm hats and scarves are the perfect complement to any outdoor outfit.

Pullover etc.
Comfortable pullovers, hoodies and fleece jackets provide an extra insulating layer over the base and middle layers.

Winter jackets
Stylish winter jackets not only look cool but also keep the cold out.

Middle layer
The middle layer is worn between the base and the top layers. It keeps the body warm while continuing to wick moisture away.

Softshell jackets
Softshell jackets can be worn as either a middle or a top layer, depending on the weather.

Rain trousers
Waterproof rain trousers keep your legs dry in all kinds of weather.

Trousers
Water-repellent, windproof and breathable trousers are a suitable addition to any outfit in any weather.

Top layer
The top layer protects against external effects such as wind, rain and snow. It also retains the heat that has built up inside the inner layers.

TOP-CLASS TOP LAYERS

Rain, snow and freezing cold – you need the right clothing on top to keep warm underneath. We offer the perfect top layer in the form of a wide range of winter jackets for ladies and gents.

Soaked to the skin and frozen from being outdoors? That's history now – thanks to our water- and windproof models. They stand up to harsh external weather conditions and keep your body warm. Our winter jackets offer a maximum of wearing comfort and high levels of functionality for outdoor use.

Windproof
The windproof material repels cold from the surface.

Breathable
Breathable material ensures that moisture can be wicked away to the outside.

Waterproof
The waterproof outer shell prevents moisture penetration.

Cosmic Jacket navy/yellow, Art. 3602
Slope Winter Trousers slate, Art. 3647

COOL LOOK

Even in below-freezing temperatures, there's no need to miss out on cool looks, thanks to the trendy designs of our models.

Quilted padding, zips in contrasting colours and reflective piping all add to the smart appearance, while the fashionable details of our garments appeal to every taste and ensure a cool look in winter.

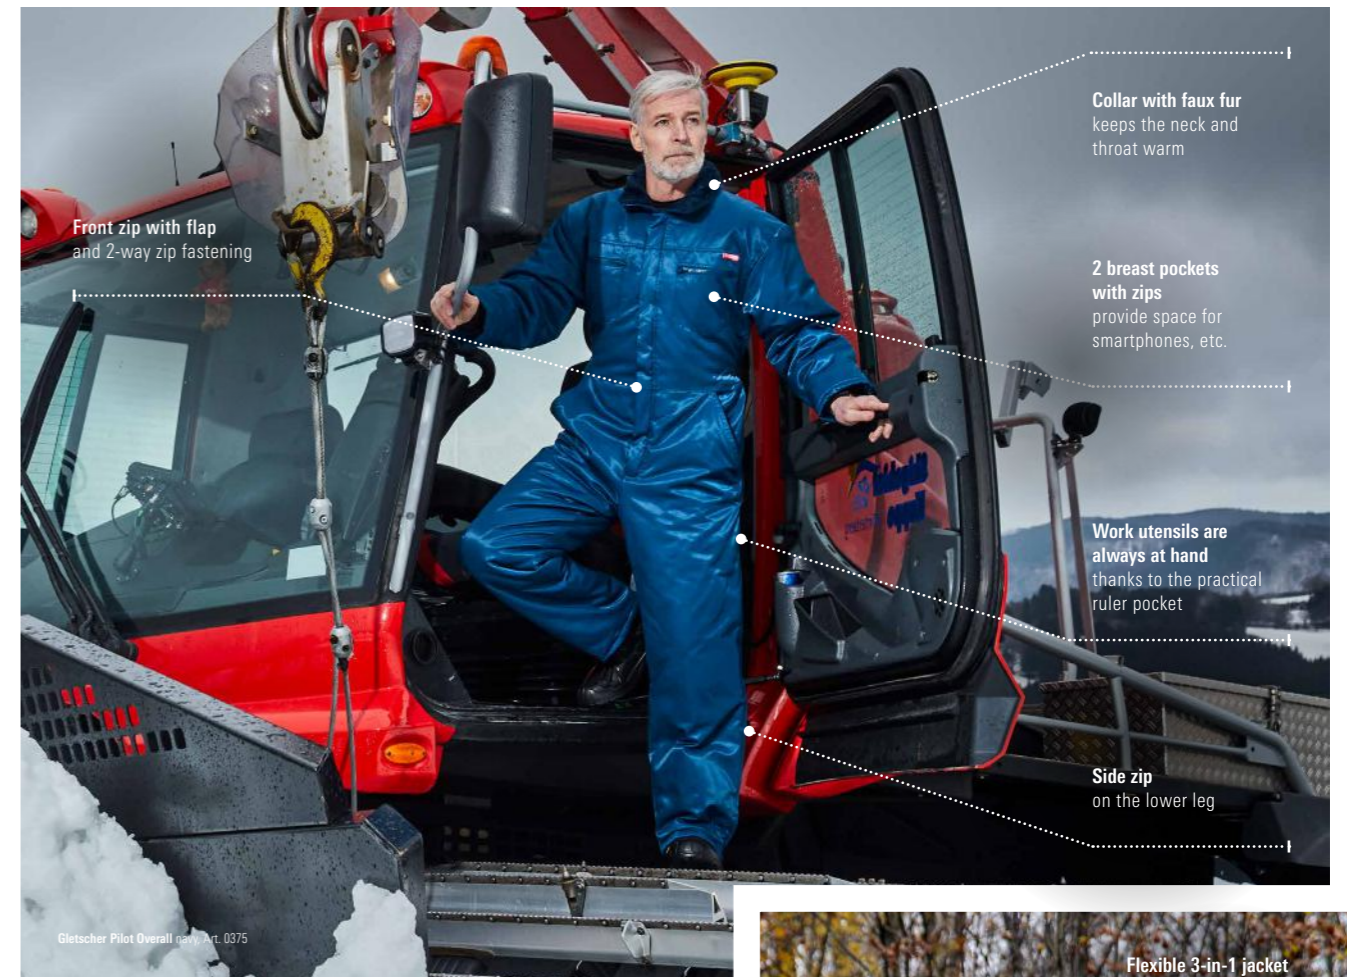

Responsible trading
We avoid the use of down feathers in all our thermally insulated garments, and instead use alternative materials as padding that are just as efficient at heat retention.

Extra weather protection
The wind break in the waistband and internal cuffs with thumb loops keep the wind and weather out.

Waterproof zips
Ensure that no moisture enters the pockets.

Men's Powder Jacket royal blue, Art. 3040
Slope Winter Trousers slate, Art. 3647

Front zip with flap and 2-way zip fastening

Collar with faux fur keeps the neck and throat warm

2 breast pockets with zips provide space for smartphones, etc.

Work utensils are always at hand thanks to the practical ruler pocket

Side zip on the lower leg

Gletscher Pilot Overall navy, Art. 0375

Our winter ranges offer many useful features that benefit you in everyday use, for instance: Pockets for carrying personal items. Detachable hoods and removable inner jackets can be worn as options. Lined collars keep the neck and throat warm.

An absolute eye-catcher
Decorative seams in contrasting neon colours

BEAUTIFULLY SOFT

Looking for the perfect solution between a fleece and a winter jacket? We have just the item you're looking for: our softshell jackets.

Softshell jackets from the PLANAM Outdoor Collection feature a remarkable structure: a wind and water-repellent outer layer on one side, complemented by a breathable inner layer that insulates and wicks away moisture on the other. A soft material, softshell also offers a good fit, high wearing comfort and maximum freedom of movement. The result: a perfect compromise between a fleece jacket and a winter jacket that can be worn as either a top or a middle layer, depending on the weather.

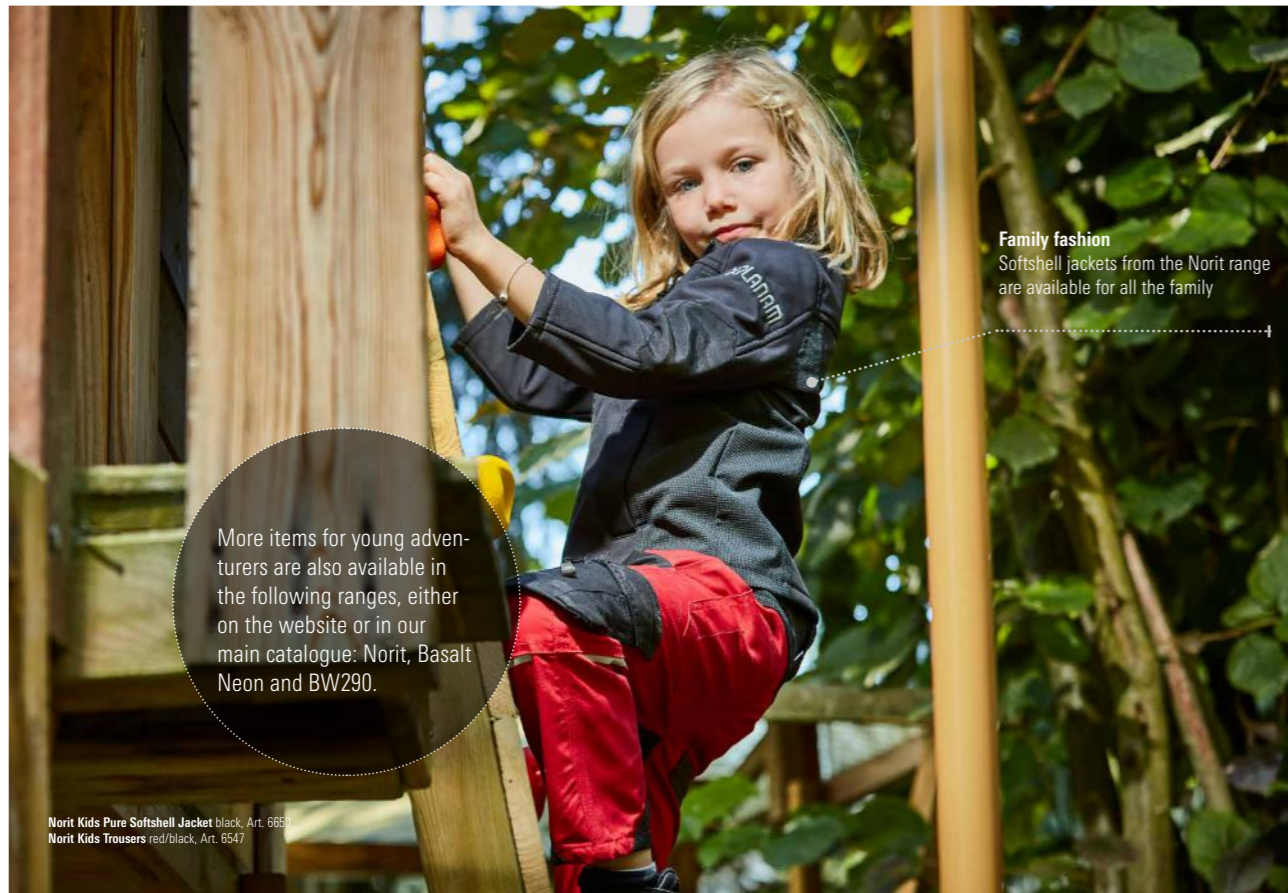

LEISURE TIME IS FEELGOOD TIME

Stand up to wind and weather with the adjustable hood

Fleece on the inside gives the jacket a pleasing wearing comfort

Kontrast Softshell Jacket grey/orange, Art. 3732
Hike Trousers black, Art. 3075

Family fashion
Softshell jackets from the Norit range are available for all the family

More items for young adventurers are also available in the following ranges, either on the website or in our main catalogue: Norit, Basalt Neon and BW290.

Norit Kids Pure Softshell Jacket black, Art. 6651
Norit Kids Trousers red/black, Art. 6547

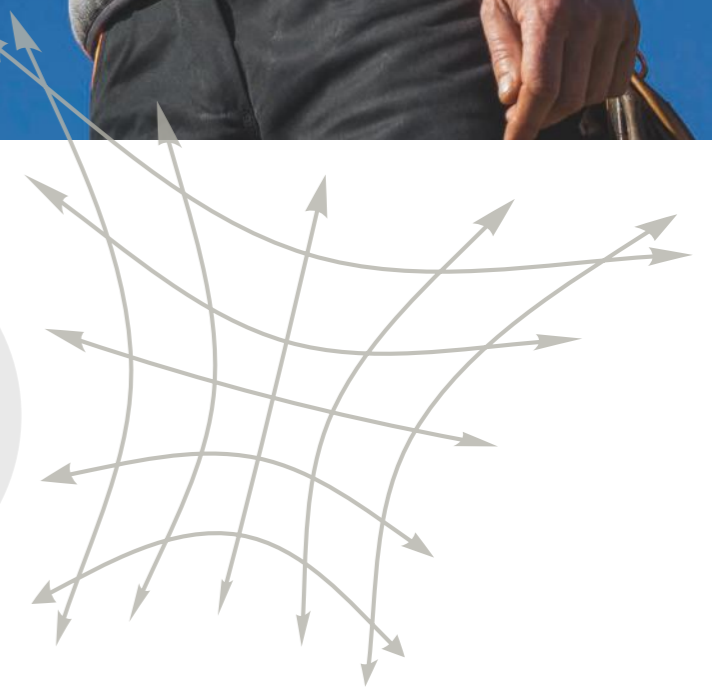

If you want to enjoy your leisure time, it's important to have the right clothing. Our recommendation: softshell garments from the PLANAM Outdoor Collection.

Our softshell garments make for ideal free-time clothing, whether you're a young or a more seasoned adventurer. On the one hand, the soft material is pleasant to wear. On the other, softshell is a highly flexible top material that allows maximum freedom of movement – the ideal conditions for hiking and discovering nature.

Fog Softshell Jacket blue, Art. 3763

Softshell is a particularly flexible material that ensures maximum freedom of movement when used as a top layer for clothing.

OUTDOOR SOFTSHELL

JUST PULL OVER

Sometimes the weather means you need another layer to stay warm. This requires layering up like an onion. The solution: a cosy jumper.

Depending how cold it is, our jumpers are perfect as top or middle layers. Worn between shirts and jackets, they create an additional insulating layer of clothing that keeps out the cold. They also benefit from a fleece lining. The material increases the warmth of the jumper and is also incredibly comfortable.

Bear Jacket black, Art. 3752
Nurit Men's Trousers olive/black, Art. 6405

Cosy teddy fleece lining
keeps you warm inside

Cuffs on sleeve and hem
fit snugly to keep out wind and cold

Perfect fit
The generously cut back section fits perfectly even during dynamic movements.

Cozy Pullover black, Art. 3060
Neptun Vest slate, Art. 3236
Easy Men's Trousers black, Art. 3000

VESTS ARE THE BEST

Too cold for just a pullover, but too warm to put on a thick jacket? The perfect mid-layer: vests from our Outdoor Collection.

Thanks to insulating materials, the PLANAM vests collection includes the right models for a range of temperatures. We also refrain from using down, and therefore do not support live plucking.

Plenty of storage space thanks to patch pockets

Square Shirt long-sleeves red/zinc, Art. 0493
Turbo Vest black, Art. 3691

Our vests are also great as a top layer in the right temperatures. The advantage: the core of the body is kept warm, while the arms have maximum freedom of movement. Pockets provide space for smartphones and other items.

Perfect outfits
by combining with shirts or pullovers

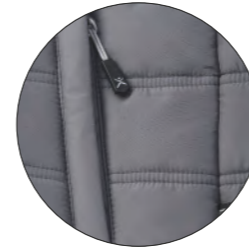

Zippered pockets
provide space for smartphones, etc..

Other garments with this colour combination can be found under PLANAM Stretchline in the main catalogue or on the website at www.planam.de/sortimente/planam-stretchline

WATERPROOF PERFORMANCE

Rainy and damp? That's not a problem for the rainwear of the PLANAM Outdoor Collection.

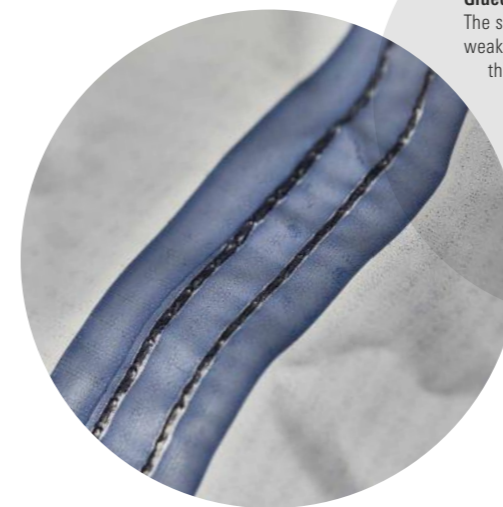

Rainwear has to be one thing above all else: waterproof. But how do you know this is the case when buying? The so-called water column scale gives an idea of waterproofing. This measuring unit indicates the level of water pressure a garment can withstand before the first drops penetrate the material.

It is thus a method for measuring waterproofness in millimetres. Accordingly, the higher the water column value, the more watertight the material. Textiles with a water column value of 1,500 mm are considered to be watertight. Most of our rainwear exceeds this value.

Glued seams

The seam area is a fundamental weakness in rainwear. The reason for this is that when the top material is sewn together, the punctures left behind in the material by the needle leave small holes that water can penetrate. Our solution: glued seams that keep moisture out.

The hood in the collar
can be optionally worn in the rain

Elasticated cuffs
prevent moisture entering the sleeves

Reflective piping
provide visibility in poor weather conditions

FAITHFUL TRAVEL COMPANIONS

Whether for work or for leisure, in autumn or in winter, trousers from the PLANAM Outdoor Collection will see you through any weather conditions.

Winter trousers, thermal trousers, knee breeches and many more: our trouser collections for ladies and gents offer the garment you need for every weather and every activity. They bring together functionality, wearing comfort and modern design. This combination makes our trousers your perfect travel companion, be it for a relaxed stroll or for DIY jobs.

UNDERCOVER IN ACTION

PLANAM functional underwear guarantees comfort at the base with the highest level of quality.

What makes our functional underwear stand out? It is light, comfortable and cuddly. This gives you maximum freedom of movement in your everyday work. Another plus: the collection's material is breathable, so your body climate is always regulated – even with strong temperature fluctuations. In addition, the outer fabric of the range is particularly easy to care for, so that all models can be washed often and dried quickly. Last but not least, the functional underwear also keeps you nice and warm on cool days.

Breathable Cool Dry material
Innovative polyester fibres ensure moisture-transport so that the body temperature is kept constant.

Perfect fit and comfort
Thanks to extremely smooth seams

Cuffs on the sleeves
Guarantee the perfect fit under workwear

Maximum freedom of movement
Due to elastane content

PLANAM – DOWN TO THE LAST DETAIL

Numerous jobs, even more challenges: Against this backdrop, not only suitable, smart workwear is required, but also well-thought-out details are important, in order to do justice to the tasks of everyday working life. That is why our range of accessories offers you numerous extras.

When the job has to be done in the freezing cold of winter, warm accessories are a must. With hats and loops made of knitwear and fleece, you are always well wrapped-up. We also have the right answer for extreme sub-zero temperatures in cold storage and freezer facilities – in the form of caps equipped with the 3M™ Thinsulate™ insert for perfect thermal insulation.

Our practical helpers support you in your work every day.

Seamlessly adjustable belts ensure the perfect fit of trousers. Thanks to practical tool pockets, hammers and the like are always at hand and ready for use. EN 14404-compliant knee pads protect the knees when working on the ground.

Practical belt buckle
With integrated bottle opener

Tool bag for trousers
With numerous compartments for utensils

Square shirt long sleeves black/zinc, Art. 0492

STANDARDS, CERTIFICATIONS & CARE INSTRUCTIONS

STANDARDS & CERTIFICATION

INFORMATION NOTE ON PERSONAL PROTECTIVE EQUIPMENT (PPE)

Personal Protective Equipment (PPE) provides the wearer with protection. It is subdivided into three categories.

PPE CATEGORY I

Category I protective clothing provides protection against basic risks, the effects of which can be identified promptly and without any danger by the user. These include superficial mechanical injuries or contact with dirt. No EU type examination certificate needs to be issued for protective clothing in Category I.

PPE CATEGORY II

This category comprises all PPE which is not assigned to Category I or Category III. It protects people from moderate risk danger e.g. high visibility clothing or light heat protection. An external body must certify Category II protective clothing and issue an EU type-examination certificate. This is valid for 5 years.

PPE CATEGORY III

All PPE that protects against mortal danger or serious irreversible damage to the health of the wearer is assigned to Category III, whereby it must be assumed that the user cannot identify the direct effects of the danger in good time e.g. the danger associated with an arc flash or chemical splashes. Certification must also be carried out by an external certifying body. PPE in Category III is also subject to a quality assurance system, which ensures monitoring and repeats the test at regular intervals. The EU type examination certificate issued is also only valid for 5 years.

FINISHING AND ALTERATION OF PERSONAL PROTECTIVE EQUIPMENT (PPE) CAT. II AND III

It is particularly important in relation to the finishing of Personal Protective Equipment (PPE) that the type of finish is specifically suited to the PPE type-examination certificate and recertified accordingly. Here too, PLANAM offers a multitude of certified options for attaching your company logo to the PPE. For any modification to the PPE which is not recertified, the type-examination certificate is no longer valid and the complete protection of the wearer is no longer guaranteed.

CE MARK

In the EU Regulation 2016/425 the mark for PPE is provided with the CE mark. CE means "Conformité Européenne" – "Conformity with EU guidelines".

- + It is a manufacturer's declaration
- + The CE mark is always attached before the product is brought into circulation
- + This only affects products which, subject to a certain provision, are required to bear the CE mark
- + It is therefore not a voluntary mark
- + All PPE listed under cat. I, II and III must be issued with a CE mark

The mark stipulates a minimum safety standard for products. Those products requiring such marking must bear the "CE" mark, in order that they may be brought into circulation at all in the EU.

EN 343 PROTECTIVE CLOTHING AGAINST THE RAIN

The European standard specifies the requirements for protective clothing against foul weather. The parameters for this standard concern resistance to penetration by water (water impermeability) and water vapour resistance (breathability).

These two parameters are subdivided into 4 classes.

For resistance to water penetration the following is required:

Water penetration resistance (WP)	Class			
	1	2	3	4
Material before washing	WP ≥ 8,000 Pa ▲ approx. 816 mm water column	–	–	–
Material after washing	–	WP ≥ 8,000 Pa ▲ approx. 816 mm water column	WP ≥ 13,000 Pa ▲ approx. 1,326 mm water column	WP ≥ 20,000 Pa ▲ approx. 2,040 mm water column
Seams before washing	WP ≥ 8,000 Pa	WP ≥ 8,000 Pa	WP ≥ 13,000 Pa	–
Seams after washing	–	–	–	WP ≥ 20,000 Pa

1,000 PA corresponds to approx. 102 mm water column. The water column specifies the water pressure that the upper material can withstand before water penetrates it. The figures specify the load limit at which the first drops penetrate the fabric.

For water vapour resistance:

- Class 1 = Ret > 40
- Class 2 = Ret > 25 ≤ 40
- Class 3 = Ret > 15 ≤ 25
- Class 4 = Ret ≤ 15

DIN EN ISO 20471 HIGH-VISIBILITY CLOTHING

Darkness and poor visibility are big risk factors when working outside. In particular, dangerous situations in road traffic, such as at roadworks, are frequently underestimated. And around railway tracks, at airports and around ports, good visibility is a top priority.

DEFINITION OF LEVELS OF RISK

Standard DIN EN ISO 20471 does not differentiate between professional and non-professional use. It is concerned generally with all hazardous situations where there is a danger of not being seen and exclusively with warning clothing for high risk scenarios. The clothing is subdivided into classes 1, 2 and 3.

Minimum area of visible material

Material	Class 1	Class 2	Class 3
Background material	0.14 m ²	0.50 m ²	0.80 m ²
Retroreflective material	0.10 m ²	0.13 m ²	0.20 m ²
Material with combined properties	0.20 m ²	n. a.	n. a.

The clothing class is based on the smallest area of visible material.

DESIGN

Emphasis is placed on the visibility of people. Fluorescent material and horizontal reflective strips are used to make the torso visible and, where applicable, trouser legs and sleeves visible too. Class 3 products must make the torso visible and, if not both, either have sleeves with reflective strips or long trouser legs with reflective strips.

Therefore warning vests or warning dungarees may not be certified individually for class 3. Clear combinations of horizontal and vertical retroreflective stripes offer the best visual contrast against most backgrounds. Excessive diagonal features and unclear shapes must be avoided. Combinations of clothing, for example a high-visibility jacket with high-visibility trousers, can be certified by DIN EN ISO 20471.

PICTOGRAM:

Labelling is with the pictogram and the class 1, 2 or 3.

The clothing's instructions for use must also state that the service life of the product is not solely dependent on the number of cleaning cycles, but also on use, care and storage.

REFLECTIVE BAND

The Reflective Material has been designed for use on high-visibility clothing, workwear and professional clothing to improve the visibility of the wearer when it is dark or visibility is poor. The material shines a brilliant white when illuminated by vehicle headlights, even if the wearer is at the edge of the road. Reflective Material is composed of exposed retroreflective lenses bonded to a durable blended fabric (65% polyester / 35% cotton). It far exceeds the minimum retroreflective performance required by the highest category (class 3). Its retroreflective properties are not dependent on the direction the clothing is facing.

EN 342 CLOTHING FOR PROTECTION AGAINST COLD

The protective clothing is worn for working in cold storage facilities and cold environments with temperatures of -5 °C or less. In order to provide optimum protection, the clothing must be worn as a suit (parka and dungarees, blouson and dungarees or overalls). In addition, the corresponding head and hand coverings must be worn, along with protective shoes. In the testing method according to EN 342, heat insulation and air permeability is tested.

The pictogram gives information about the level of protection. The figures below mean, for example, 0.477 (B) resultant thermal insulation measured while standing, performing very light or moderate activities. For the relevant period of use at different ambient temperatures, please refer to the measured value in the following table:

Insulation I_{cl} m ² · K/W	Wearer carrying out a standing activity 115 W/m ²				Wearer carrying out a moving activity Light 115 W/m ²				Moderate 170 W/m ²			
	Air velocity 0.4 m/s		3 m/s		0.4 m/s		3 m/s		0.4 m/s		3 m/s	
	8h	1h	8h	1h	8h	1h	8h	1h	8h	1h	8h	1h
0.265	13	0	19	7	3	-12	9	-3	-12	-28	-2	-16
0.310	10	-4	17	3	-2	-18	6	-8	-18	-36	-7	-22
0.390	5	-12	13	-3	-9	-28	0	-16	-29	-49	-16	-32
0.470	0	-20	7	-9	-17	-38	-6	-24	-40	-60	-24	-43
0.540	-5	-26	4	-14	-24	-45	-11	-30	-49	-71	-32	-52
0.620	-10	-32	0	-20	-31	-55	-17	-38	-60	-84	-40	-61

EN 14058 PROTECTIVE CLOTHING AGAINST COOL ENVIRONMENTS

At moderate low temperatures above -5 °C, items of clothing are used to protect against localised cooling of the body, including for activities indoors, e.g. in the food industry. Air permeability, heat insulation and thermal insulation are tested. The clothing serves to protect the body against cool environments.

3M™ THINSULATE™ INSULATION

3M™ Thinsulate™ Insulation – a modern fibre technology with functional and insulating properties that are setting new standards. The combination of 1-layer polyester padding and 2-layer 3M™ Thinsulate™ insulating finish creates a combination of materials that is unrivalled. The cold doesn't stand a chance here.

DIN EN 14404 KNEE PROTECTION FOR WORKERS KNEELING DOWN

Working in a kneeling position creates constant pressure on the knee. Knee protection is designed to distribute the forces produced evenly across it. In addition to this, it is designed to prevent injuries or damage caused by hard surfaces, small stones or similar objects lying on the ground.

Knee protection is subdivided into 4 types:

- Type 1: Knee protection that is separate from clothing and fastened to the leg.
- Type 2: Pads inserted into pockets on trouser legs or permanently attached to the trousers.
- Type 3: Equipment that is not attached to the body.
- Type 4: Knee protection forming part of a unit with additional functions.

In addition to this, there are three performance classifications:

- Level 0: No protection against punctures.
- Level 1: The knee protection is suitable for even ground where there is no risk of objects over 1 cm in height.
- Level 2: The knee protection is for use in challenging conditions, such as for example when kneeling on stones in mines or quarries.

The PLANAM knee pad product no. 9901027 is certified as Type 2, Level 1/ Level 0 knee protection. This certification only applies in conjunction with PLANAM trousers, dungarees or overalls and cannot be transferred to other products.

UV PROTECTIVE CLOTHING WITH INTEGRATED SUN PROTECTION

The largest organ of the human body is the skin, and it is exposed to great danger in summer. UV rays from the sun can increase the risk of skin cancer. Standard textiles are radiolucent, providing insufficient protection.

PLANAM's UV-protective clothing gives guaranteed certified safety. Awarded UV protection certificates "PROTECT 80" and "PROTECT 40", this range guarantees maximum prevention. Just like for sunscreens, the figure indicates the protection factor for spending longer in the sun safely. Our PLANAM models allow the wearer to remain in the sun 80 or 40 times longer than those without protection. With their integrated sun protection factor, the finished garments provide the skin with optimum protection. Those with sensitive skin can stay in the sun longer without having to cover themselves in sunscreen. It is important to know the individual skin type in order to determine the individual's protection time (length of possible exposure to the sun without risk of skin damage). The UV protection factor specified (e. g. Protect 80) gives the factor by which the individual's protection time can be extended just by wearing these textiles.

THE OEKO-TEX® STANDARD 100

The OEKO-TEX® Standard 100 is an independent testing and certification system for raw, intermediate and end products for textiles from all stages of processing. Examples of certifiable articles are raw and dyed/refined yarns, raw and dyed/refined woven and knitted fabrics, ready-made articles (garments of all types, home textiles, bedding, terry towelling, toys made of textiles and many others).

Tests for harmful substances cover:

- + substances banned by law
- + substances regulated by law
- + chemicals that are known to be potentially harmful to health (but are not yet regulated by law)
- + healthcare parameters in their entirety, the requirements go well beyond existing national legislation.

Why OEKO-TEX®?

The OEKO-TEX® Standard 100 was developed in the early 1990s as a response to the need of consumers and the general public for textiles

that do not pose a risk to health. Negative headlines such as "Poisons in textiles" were widespread at the time, labelling all chemicals used in the production of textiles as negative and harmful to health.

Yet the demands made of modern textile products cannot be met without using certain chemical substances. Fashionable colours, easy care, long life and many other functional properties are demanded of textiles today and are, to some extent, and depending on their intended use (e.g. for professional and protective clothing), quite indispensable.

INITIATIVE FOR COMPLIANCE WITH SOCIAL STANDARDS IN PRODUCING COUNTRIES

PLANAM has joined the social fairness initiative (sozial-fair) set up by the Association of Non-food Importers (Verband der Fertigwarenimporteure: VFI). This obliges our suppliers to comply with the conditions of sozial-fair, to ensure a socially fair, humane environment for working conditions in both their own manufacturing facilities and in those upstream.

We are conscious of our social responsibilities and support international regulations with regard to child labour and the prohibition of forced labour. Furthermore, we require our suppliers to set minimum standards in workplace health and safety and to ensure working hours and remuneration comply with statutory provisions or collective agreements and that freedom of association is granted.

PLANAM confirms and documents compliance with the standards within the company and with its suppliers and provides the corresponding documentation to the authorised VFI inspectors in general, as well as to the individual participating company on an individual and contract-related basis. This enables us to ensure responsible production by our suppliers on the basis of social standards. You can find out more at <https://vfi-deutschland.de/social-fair>.

CARE INSTRUCTIONS

WASHING

This symbol says whether domestic laundering is or is not possible and applies both to washing by hand or by machine. The numbers in the wash-tub correspond to the maximum washing temperatures in degrees Celsius and must not be exceeded. A bar below the wash-tub means that gentle handling is required with a reduced amount of laundry and slower speed during the spin-dry cycle.

Boil wash / Normal cycle

Laundry made for example of cotton or linen, white, boil-proof, dyed or printed. Fill drum completely. Set the respective wash cycle.

60°C coloured laundry / Normal cycle

Coloured laundry that is not boil-proof, made for example of cotton and polyester as well as blended fabrics. Set the respective wash cycle.

40°C coloured laundry / Normal cycle

Wash cycle for example for dark coloured articles made of cotton, polyester, blended fabrics etc. Set the respective wash cycle.

40°C Easy to care for / Gentle cycle

„Easy to care for“ articles made for example of synthetic fibres (polyacrylic, polyester and polyamide). Reduce amount of laundry (drum filled half way at most). Set the respective wash cycle. Do not spin-dry or only spin briefly because of the risk of wrinkling.

30°C coloured laundry / Normal cycle

Wash cycle for example for dark coloured articles made of cotton, polyester, blended fabrics etc. Set the respective wash cycle.

30°C easy-care / Gentle cycle

„Easy-care“ items, for example, those made from modal, viscose or synthetic fibres (acrylic, polyester and polyamide). Reduce the volume of laundry (drum up to half full). Use the relevant washing programme. Do not spin or use only a short spin to avoid creases.

30°C Delicates / Wool Wash

Items made, for example, of machine washable wool. This washing cycle is characterised by a particularly gentle treatment process. Significantly reduce washing load (only fill the drum up to a third). Use the relevant washing programme.

Do not wash

Any items bearing this label may not be washed. They may react adversely to moisture, or due to their size are unsuitable for washing in a household washing machine.

BLEACHING

The triangle provides information on whether the article can or cannot be bleached.

All types of bleaches

The empty triangle is the symbol for chlorine or oxygen bleaching.

Oxygen bleaching

Only oxygen bleaching (contained in universal detergents) is permitted, but not chlorine bleaching.

Do not bleach

The empty triangle with an X through it symbolises that bleaching is not possible. Only use detergents that are free of bleach.

DRYING IN THE TUMBLE DRYER

The square is the symbol for the drying process. The circle in it provides information on drying in a tumble dryer. The number of dots in the drying drum specify the drying levels. If there is no tumble dryer symbol, then the symbols for washing and ironing give some information on drying. The more intensive the permissible type of handling, the simpler drying is. The lower the care levels, the more caution is necessary when drying in the tumble dryer. The program text does not currently clearly state which textiles are suitable for drying (tumble dryer) for all appliances.

General instructions for drying in a household tumble dryer

- + Spin-dry the laundry at the highest speed possible before drying (as high as the laundry symbol permits).
- + Do not overfill the drum of the dryer.
- + Only put items with the same drying time in the dryer together.
- + For example, cottons and synthetic fibres have a different drying duration and will therefore retain some residual moisture after different drying times.
- + Do not over-dry laundry; it uses energy unnecessarily.
- + Do not dry items in the tumble dryer if they, or their shape, are sensitive to heat.
- + Always observe the manufacturer's operating instructions.

Normal drying

Drying possible in the tumble dryer with normal loading without restriction.

Gentle drying

Exercise caution when drying in the tumble dryer. Select gentle treatment with reduced loading (temperature, drying time).

Do not tumble dry

Item cannot be dried in the tumble-dryer.

IRONING

The dots identify the temperature ranges of the iron (regulator, steam, travel irons as well as ironing machines). In common irons, these setting ranges are sometimes also assigned to specific raw materials. The maximum temperature must be selected solely on the basis of the care symbol and not according to the raw material content of a textile article.

Hot iron

Also corresponds to the „Cotton/linen“ temperature setting of the iron. Iron while damp or moisten as required. Use an ironing cloth on shiny or pressure-sensitive items or iron them inside out. A steam iron can be used.

Iron at moderate temperature

Corresponds to the „Wool/silk/polyester/viscose“ temperature setting. Iron under a moderately moist intermediate cloth. A steam iron can be used. Avoid heavy pressure. Do not pull out of shape.

Iron at low temperature

Corresponds to the „Polyacrylic, polyamide (nylon), acetate“ setting. If necessary, shiny or pressure-sensitive items should be ironed with a dry press cloth or inside out. Caution when using steam irons (as a rule, work without steam). Do not pull out of shape.

Do not iron

Unsuitably, irreversible changes are to be expected if an iron is used.

PROFESSIONAL TEXTILE CARE

The symbol gives information on whether professional textile care is or is not recommended. With this new care symbol, both organic solvents as well as special wet processes are taken into consideration; therefore the care symbol differentiates between dry cleaning (previous chemical cleaning) and wet cleaning.

Dry cleaning

The letters within the circle are intended for professional textile cleaners. They give information on the solvents that can be used during the cleaning process. The bar below the circle indicates that certain limitations in the dry-cleaning process are required. These may concern the mechanical action, addition of moisture, bath and/or drying temperature. When choosing the cleaning process, the professional textile cleaner must also take into account the nature of the textile materials and the degree of soiling (normal/mild process).

Treatment in cleaning machines with the following solvents: perchloroethylene, hydrocarbons

Normal cleaning process with no restrictions. Commercial stain removers on a solvent base may be used with some restrictions. A trial on a concealed part of the article is advisable beforehand.

Treatment in cleaning machines with the following solvents: perchloroethylene, hydrocarbons

Cleaning process with stringent limitation of added humidity and/or mechanical action and/or temperature. Commercial stain removers on a solvent base may be used with some restrictions. A trial on a concealed part of the article is advisable beforehand.

Do not treat with solvents

No dry-cleaning possible. Do not use stain removers that contain solvents.

COMMENTS

The label contains information on the maximum permissible treatment and proper care of the identified textiles. The care symbol is not a guarantee of quality. Care treatment that is carried out in accordance with the information on the label guarantees that the textile product will not be damaged. It does not, however, guarantee that all soiling and stains will be removed. Milder types of treatment and temperature than those given on the label are permitted at any time.

MEDIA DATABASE

Product pictures, texts, sketches or PDFs of our catalogues – our media database grants you access to comprehensive information on our items and collections. It's as easy as one, two, three: enable access; request and enter password; download data in web and print resolution.

Images

You gain access to optional product images (with and without model), insightful detail shots and mood-based images of our collections.

360 degree shots

These all-encompassing shots allow you to view our items from all perspectives.

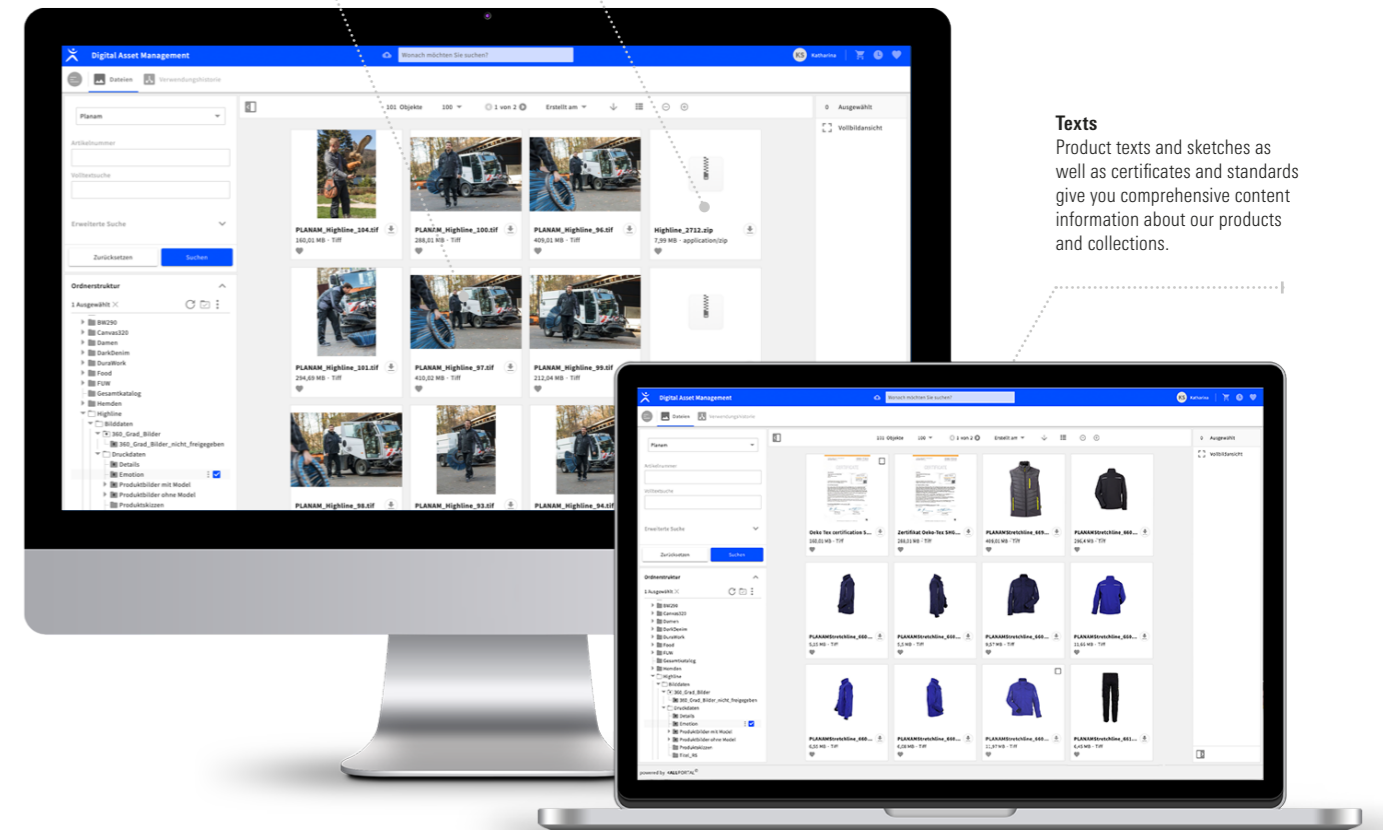

Your personal access

Secure your access now and request your personal password from your contact or by emailing info@planam.de.

We will send you your access data immediately and will be happy to explain how to use our media database.

Texts

Product texts and sketches as well as certificates and standards give you comprehensive content information about our products and collections.

PERSONALISATION IN THE BLINK OF AN EYE

Workwear is advertising space for your logo and acts like a business card for your company. Personalisation ensures a recognisable and positive company image. Our finishing service brings your message to a wider audience in an individual, professional and fast manner.

PLANAM Individual specialises in personalising your workwear. From reflective appliques to transfer prints and embroidery, we offer multiple personalisation options of the highest quality. Whether you need small quantities for handcraft businesses or large runs for industrial companies – our team of experts are on hand to provide you with personal advice and detailed information about the optimal finishing types for our products. This also applies to finishing options where the processes are specially adapted to certification. We also ensure the radiantly cool look of your personalised workwear – with reflective PLANAM patch tattoos in four variations, for visual highlights on trouser legs or the backs of jackets, for example. Also possible: We can also customise silver reflective patch emblems, such as in the shape of your company logo. The results are unmissable and stylish at the same time.

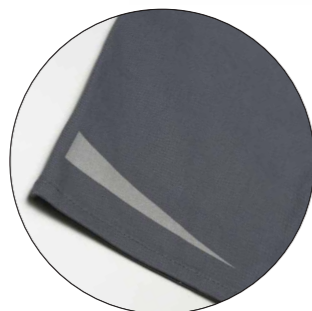

Important note: Applying additional reflective stripes does not mean that the garments are considered to be high-visibility clothing.

Reflective tape
For even better visibility we sew on or patch on reflective tape for you – customisable to suit your requirements.

Motive „Brush“
Product no. 9901401
Measurements: approx. 25 x 9,5 cm

Motive „Wedge“
Product no. 9901404
Measurements: approx. 2,5 x11,5 cm

Motive „Square“
Product no. 9901402
Measurements: approx. 25 x 7,5 cm

Motive „Bubble“
Product no. 9901403
Measurements: approx. 25 x 8,5 cm

Individual logo, individual support
You can call us for advice from Monday to Friday between 8am and 5pm.

Bright transfer prints
Whether you need a patch on the back, dungaree pocket, sleeves or trouser legs, we ensure that your logo looks brilliant.

Bright transfer prints
Whether you need a patch on the back, dungaree pocket, sleeves or trouser legs, we ensure that your logo looks brilliant.

Direct embroidery
You provide your individual template or a pre-existing embroidery design and we will prepare a custom quote for you.

FINISHING WITH DIVERSITY

The individual personalisation of workwear must leave scope for different designs. Therefore, we provide you with numerous finishing options that meet your requirements.

Our range of high-quality personalisation options is large and ranges from direct embroidery with high-quality polyester yarn to washable transfer prints, which can also be ironed. We also provide a great finish for your company logo as well as your valued employees' names in a respectful manner, all to ensure your perfect company image.

The finish - signed and sealed (PPE)
Finishing options are specially tailored to the PPE type examination certificate

Printed patches
If a printable patch is sufficient, we can "personalise" your clothing. Whether you require your company logo or text, our reproducible transfer prints stand out thanks to their high quality and typography, and they can also be washed and ironed. The choice of colours is just as varied as the design options.

Fully personalised
The personalisation of employee clothing has many advantages: it creates trust amongst customers, encourages employee loyalty and stops employees from mixing up their clothing. Whether you require a transfer print, embroidered emblem or direct embroidery, we can provide a finish featuring your employees' names on our products. Also possible: Embroidered patches with Velcro which ensure flexible use on a range of items of clothing.

Embroidered emblems
Based on your design, we will embroider your individual emblem and then sew it on.

Customised service
From sewing on additional pockets and knee pockets to tailoring garments to size – our team are happy to meet any individual request you may have. Changes to conform to standards can also often be made after consultation.

CLOTHING SIZE CHART – BODY HEIGHT
